

ENVIRONMENTAL POLICY (ISO 14001)

Remote Water Treatment Services is committed to managing its operations in an environmentally sustainable and responsible way. We take a proactive and resourceful approach to water treatment and recognise our responsibility in adopting environmentally sustainable practices. Our nationwide staff policy is in accordance with ISO 14001 and complies with all environmental laws, regulations and reporting requirements. Our progressive policy for waste disposal ensures resources are used sustainably and waste is disposed of responsibly.

We recognise that the nature of our work has the potential to impact the environment and aim to minimise this impact by integrating environmental considerations across all aspects of our business.

OVERALL OBJECTIVES

We are committed to continual environmental improvement and prevention of pollution. We will work with our clients, suppliers and the community in order to achieve the following:

- Establishing and reviewing measurable quality objectives via management review, and recording them in our current Objective and Targets Register;
- Continually improving the integrated management system via management review, internal audits, and corrective and preventative action reporting;
- Communicating this policy throughout the organisation to ensure it is understood; and
- Reviewing this policy at management reviews to ensure it remains up to date.
- Encouraging our employees to report safety and environmental hazards immediately;
- Reducing waste through innovative work and recycling practices;
- Minimising environmental impacts by reduction of polluting substances produced; and

- Identifying specific environmental risks that could occur as part of a project and taking action to minimise this risk.

RESPONSIBILITIES

Remote Water Treatment Services recognises the responsibility to environmental sustainability safe workplace rests with management, who will be accountable for the implementation, maintenance and communication of this policy to our workers and the public.

These responsibilities include:

- Where hazards are identified and/or reported and if proper rectification is beyond the control of the company, a referral will be made to the appropriate body;
- Material safety data sheets will be provided for all equipment with potentially hazardous substances; and

Provide adequate resources to meet these environmental commitments.

Signed:

Alex Roussetos
Managing Director
